

Installation Svalbard F

The mounting bar is fitted on Svalbard-F.
To loosen the mounting bar push the mounting bar against the air connection.

Svalbard F is 437mm wide and 1200, 1800, 2400 or 3000mm in length.
It is possible to adjust ± 45 mm lengthwise with the mounting bar.

Fit the mounting bar to the ceiling, like the sketch.
Start with the centerhole.

Measure the centerpoint for the desired location.
Adjust the mounting bar and attach the remaining screws.
Lift the Svalbard-F against the mounting bar. Feel free to use mounting lift.

The unit is positioned correctly when you hear a click.
The unit can now be adjusted lengthwise, and is correctly installed.
